

143 games, ready for every screen on your aircraft.

Seatback, passenger devices, airline portal, embed in airline mobile app, and at home after landing. Try one now.

Play any of the 143 titles now, in your browser: www.airporio.com/airlines

THE CATALOGUE

Pick any title. It opens right here.

Every tile starts the real game in your browser. Puzzles and word games, racing and sports, card and board games, and titles made for families.

RUNS ON YOUR SYSTEM

One catalogue, five ways on board.

Consistency across the fleet.

- **Seatback**
Android or Linux application for your seatback system.
- **Passenger devices**
HTML5 served from your onboard wireless server, for the phones and tablets passengers bring.
- **Your portal**
Embedded in the airline portal you already run, in your look, beside your other content.
- **Cloud**
Hosted by Airporio for aircraft with high-bandwidth connectivity, with nothing to install onboard.
- **After the flight**
On airporio.com or in airline mobile app, so a game started in the air is still there on the ground.

BUILT FOR IFE HARDWARE

One build for every screen and every controller.

Titles are made for the displays and input devices already fitted to your cabins.

- **Native 4K rendering**
Games draw at the resolution of the screen, so a large seatback display shows crisp artwork edge to edge.
- **Android and Linux**
Legacy Android builds through Android 17, and builds for Linux seatback systems.
- **Touch, handset and gamepad**
Touch, the IFE handset's game controls, and Bluetooth gamepads, all from one build.

MULTIPLAYER AND CABIN ENGAGEMENT

Turn a cabin into a crowd.

Passengers play each other across the aisle, across the cabin and across the fleet.

- **Row versus row**
- **Cabin, fleet and alliance leaderboards**
- **Flight-phase scheduling**
- **Games for premium cabins**

YOU CONTROL THE CATALOGUE

Your catalogue, flight by flight.

In the Airporio portal you choose which titles run where, and change it whenever you like.

- **By fleet**
- **By route**
- **By region**
- **By season**

PLAY CONTINUES AFTER LANDING

The flight ends. The game doesn't.

Passengers carry on at airporio.com or airline mobile app after they land, and features you choose unlock with their flight number: a reason to remember who flew them there.

- **Pick up where they left off**
- **Unlocked by flight number**
- **A loyalty moment you own**

COMMERCIAL MODEL

Licensed your way, quoted for your fleet.

License the whole catalogue or only the titles you choose. Your quotation is built from your fleet, appears in your airline portal, and is confirmed with you by our team.

- **The whole catalogue**
- **Individual titles**
- **Quoted for your fleet**

YOUR DATA

Your data stays yours.

Onboard, Airporio collects no passenger data of its own. Anything you choose to capture belongs to you; Airporio implements and integrates it, and nothing more.

SERVICES

We take it all the way to the aircraft.

From the test rack to the cabin, with your teams and your integration partners.

- **Validation and deployment**
- **Integration**
- **Custom titles**
